title: “The Complete Andreescu Library” subtitle: “A Free, Link-Verified Guide to the Books of Titu Andreescu — Olympiad Mathematics Teacher to the World” author: “Compiled by Indrajeet Yadav · github.com/Yosoyun” date: “June 2026”

The Complete Andreescu Library

*A freely shared, independently compiled guide to the life, achievements, and complete bibliography of **Titu Andreescu** — with **machine-verified** links for any student or teacher, anywhere, to read his work legitimately.*

Few people have shaped the mathematical lives of more students than Titu Andreescu. Across four decades — first in Romania, then in the United States, and through his books in classrooms from Chennai to California — he has done one thing better than almost anyone alive: he has taught people how to *think* about hard problems.

Yet many talented students, and even teachers, have never heard his name. **This guide exists to change that.** It gathers, in one place, who he is, what he built, every book he has written or edited, and where you can legitimately find each one.

Who Is Titu Andreescu?

Titu Andreescu was born on **19 August 1956 in Timișoara, Romania**, and was drawn to mathematics early. As a high-school student he won the Romanian national problem-solving contests three years running (1973–1975).

He taught at the Constantin Diaconovici Loga school, edited *Revista Matematică din Timișoara* (1981–1989), and coached the Romanian IMO team — earning the national title of “Distinguished Professor” in 1983. In **1990 he emigrated to the United States**, joining the Illinois Mathematics and Science Academy. He went on to coach the United States IMO team for a decade, direct the Mathematical Association of America’s American Mathematics Competitions (1998–2003), chair the USAMO committee, and serve on the IMO Advisory Board. He earned his Ph.D. (on Diophantine analysis, advisor Mihail Megan) from the University of Timișoara in **2003**, and is an associate professor at the **University of Texas at Dallas**.

Reliable profiles credit him with **more than forty** distinct books; counting editions, translations and the annual and journal volumes the total is higher (Goodreads lists 88+ records). He has contributed hundreds of original problems to competitions worldwide.

A Teacher’s Journey — Timeline

Year	Milestone
1956	Born in Timișoara, Romania.
1973–75	Wins the Romanian national problem-solving contests three years running.
1981–89	Editor-in-chief of <i>Revista Matematică din Timișoara</i> ; coaches the Romanian IMO team.
1990	Emigrates to the USA; joins the Illinois Mathematics and Science Academy.
1993–2002	Coaches the USA IMO team (a decade); directs the Mathematical Olympiad Summer Program (1995–2002).
1994	The USA team scores a perfect 252 in Hong Kong — the first nation ever to do so.
1998–2003	Directs the MAA’s American Mathematics Competitions.
2002	Elected to the IMO Advisory Board.
2003	Earns his Ph.D. (Diophantine analysis), University of Timișoara.
2006	Founds AwesomeMath , the free journal Mathematical Reflections , and the Metroplex Math Circle; professor at UT Dallas.
2008	Founds XYZ Press (with Alina Andreescu).

Honors & Appointments

- **1983** — “Distinguished Professor”, national teaching award (Romania).
- **1984** — Appointed Counselor of the Romanian Ministry of Education.
- **1994** — **Edyth May Sliffe Award** for Distinguished High-School Mathematics Teaching (Mathematical Association of America).
- **1995** — MAA Certificate of Appreciation for coaching the USA team to its perfect IMO performance.
- **2002** — Elected member of the **IMO Advisory Board**.

What He Built

- **AwesomeMath (2006)** — a summer program for gifted students (UT Dallas, Cornell, University of Puget Sound), plus a year-round program.
- **Mathematical Reflections (2006, free)** — a free online journal: six issues a year of problems and articles.
- **The AMC (1998–2003)** — as director of the MAA's American Mathematics Competitions.
- **XYZ Press (2008)** — his publishing house for rigorous problem-solving books.
- **USA IMO Team (10 years)** — head coach 1993–2002, including the historic 1994 perfect score.
- **Metroplex Math Circle (2006)** — weekend olympiad enrichment at UT Dallas.

The Complete Catalogue

Organised by series and publisher. The **interactive web edition** gives per-book *verified, direct* links to buy (Amazon India), borrow (Internet Archive), preview (Google Books) and the publisher page. ISBN-13s below were machine-verified.

TRAINING OF THE USA IMO TEAM

Title	Year	Collaborators	ISBN-13	Topic · Level
101 Problems in Algebra — <i>From the Training of the USA IMO Team</i>	2001	with Zuming Feng	9781876420123	Algebra · Olympiad

How to Use This Guide

Students: start free with *Mathematical Reflections* and the AMC archive; pick your level (Intermediate → Olympiad → *Problems from the Book*); choose by weakness and work one book cover to cover. **Teachers:** share this guide, build a reading ladder by level, use the free journal for fresh problems, and order titles for your library.
